

# Metallic Pigments

**Malachite**

**Kyanite**

**Tanzanite**

**Star Sapphire**

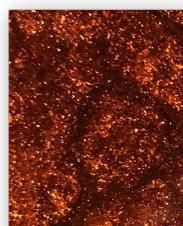

**Tiger Eye**

**Sunstone**

**Hessonite**

**Brown Zircon**

**Danburite**

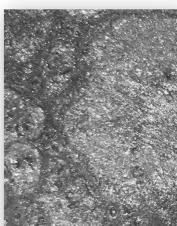

**Smoky Quartz**

**Boulder Opal**

**Obsidian**

**Galena**

**Moonstone**

**Magnetite**

**Black Onyx**

Colors shown are approximate. Resin and hardener selection, substrate, mix ratio, application technique, ambient temperature, and relative humidity may affect color. Field tests are required in order to validate performance and appearance before use.

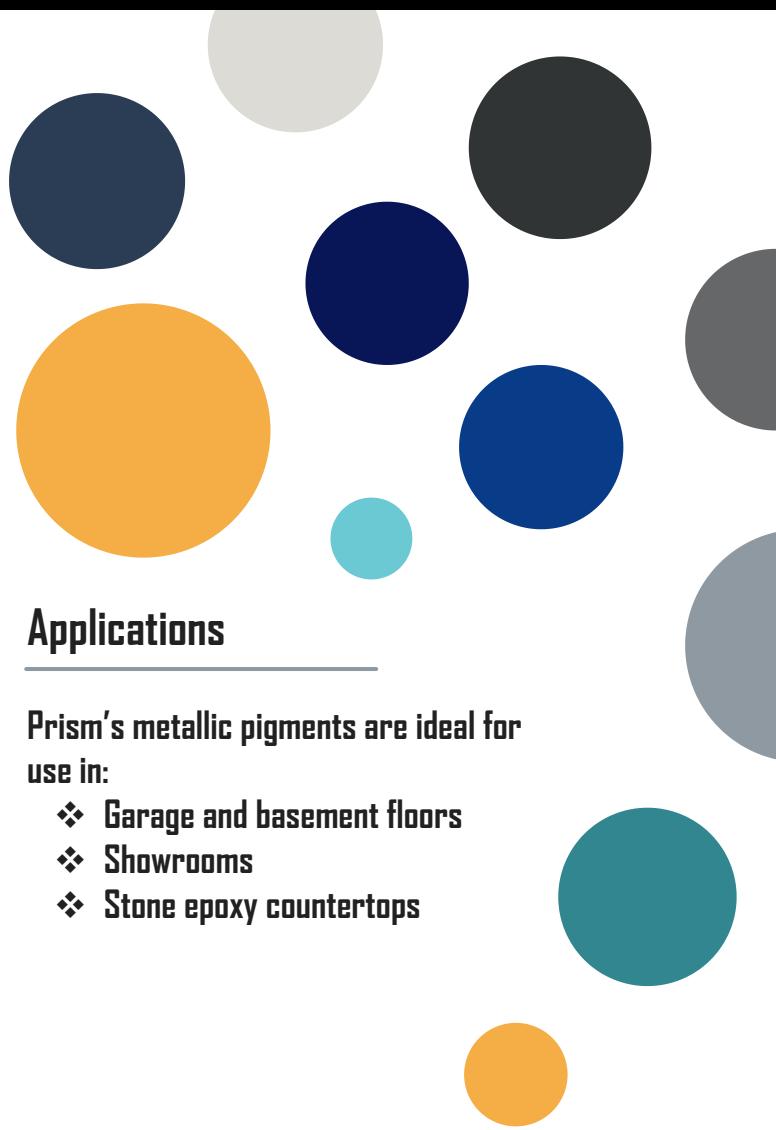

# Metallic Pigments

Prism Corporation's metallic pigments are special effect pigments composed of mica nanoparticles blended with various organic and inorganic pigments to create beautiful pearlescent and iridescent effects. When mixed with clear epoxy, these metallic pigments imitate the natural look of stone and rock formations. The result provides a coating with a reflective shine and creates eye-catching dramatic color.

## Who We Are, Our Story

Prism Corporation sells powder pigments and other colorant products for both residential and commercial use. For over 30 years, our mission has been to create exemplary value for our customers through thoughtful service, skill, and care.

## Applications

Prism's metallic pigments are ideal for use in:

- ❖ Garage and basement floors
- ❖ Showrooms
- ❖ Stone epoxy countertops

## Full-Service Lab

Prism's full-service lab meticulously analyzes all materials throughout the production process to ensure quality color every time. The team can also develop new custom formulations beyond our core product offerings for all your pigment needs.
